DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 04/27/2007 has been entered.

Claims 1-4 and 9-15 are currently pending.

Claims 1-4 and 9-15 are currently under examination.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-4, drawn to a method of treatment comprising administration of a medicament for treating climacteric and post menopausal distress.

Group II, claim 9, drawn to a medicament capable of substituting or complementing hormone replacement therapy, said medicament consisting at least in part of an extract obtained by concentration of an extract fluid from *Cimicifuga racemosa* in the presence of an effective amount of poly(vinylpyrrolidone) as a solvent mediator.

Group III, claim(s) 10-15, drawn to a method of treatment comprising administration of a medicament as a substitute or complement of a hormone replacement therapy.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Claim 9, at least, is anticipated by or obvious over Houston et al. (A, US Patent Number: 2004/0071685 A1). Houston teaches a pharmaceutical composition (which reads on medicament) comprising of an extract of black cohosh (See page 3, paragraph 0031), which is synonymous with *Cimicifuga racemosa*, and polyvinylpyrrolidone (See page 7, paragraph 0083). Houston further teaches that black cohosh contains isoflavones, which are used to treat hot flashes in post-menopausal women (See page 1, paragraph 0009, continued onto page 2). Houston does not expressly teach that the composition is capable of being used as a substitute for or a complement to hormone replacement therapy, however the composition as taught by Houston is and in the same as that claimed by Applicant, therefore, the properties of the composition (as a substitute for or a complement to hormone replacement therapy), as claimed by Applicant, are inherent to the composition taught by Houston. It is also important to note that product-by-process claims are not patentably distinct from product claims (See MPEP § 2111.01). Consequently, the special technical feature which links the claims does not provide a contribution over the prior art, so unity of the invention is lacking.

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provisions of MPEP § 821.04. **Process claims that depend from or**

otherwise include all the limitations of the patentable product will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103, and 112. Until an elected product claim is found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined. See "Guidance on Treatment of Product and Process Claims in light of *In re Ochiai*, *In re Brouwer* and 35 U.S.C. § 103(b)," 1184 O.G. 86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution either to maintain dependency on the product claims or to otherwise include the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
